ajmSoft ZipCode Demographic

File Specifications

Effective Date: Feb 16, 2002

File Abstract:

ajmSoft ZipCode Demographic is a multiple table database containing demographic data organized by ZCTA. ZCTA is a Zip Code Tabulation Area as defined by the US Census Bureau. They are designed to coincide with United States Postal Services Zip Code geographic boundaries. A single record exists for each Zip Code for completeness. Please note that some Zip Codes do not represent geographic areas (i.e. a Zip Code may represent a single PO Box). These codes will not contain any data. Individual elements are derived from public and proprietary sources including the US Census Bureau.

ajmSoft US Population History Database

File Specifications

Effective Date: Aug 11, 2005

File Abstract:

The US Population History Database contains Census Estimates for the Entire United States from 1970 thru 2002. Data is grouped at the National, State and County level. The population estimates are as of July 1st of each year., therefore, the estimates reported during the decennial years (1970,1980, 1990 and 2000) will not agree with the actual reported Census Bureau data for those years. Please note that prior year estimates will change as new data is released.

ajmSoft Additional Demographic Files

File Specifications

Effective Date: Feb 16, 2002

File Abstract:

ajmSoft Additional Demographic Files is a multiple table database containing demographic data organized by Zip Code. A single record exists for each Zip Code for completeness. Please note that some Zip Codes do not represent geographic areas (i.e. a Zip Code may represent a single PO Box). These codes will not contain any data. Individual elements are derived from public and proprietary sources including the US Census Bureau.
